

Simplify Maintenance and Ensure Quality Care with Smart Technology

Introducing The PURELL SOLUTION™

The brand that created instant hand sanitizer now provides a complete solution with efficacious products, advanced monitoring technologies and clinical support designed to help improve patient safety.

PURELL SMARTLINK™ Service Alerts

PURELL SMARTLINK™ Service Alerts helps simplify dispenser maintenance, reducing unnecessary service trips, labor time and product waste – all while ensuring your staff has access to the hand hygiene products they need.

- Receive dispenser health, network, refill, and battery alerts and alarms via a mobile app, e-mail, or secure web-based portal
- Proactively service dispensers to help eliminate unnecessary touchpoints and significantly reduce or eliminate complaints
- Enhance inventory management and product utilization through accurate refill data that predicts product outages
- Easily combined with the PURELL SMARTLINK™ Activity Monitoring System to ensure product availability for increased compliance
- Easy-to-use dashboards and reports that can be used by staff or reported through leadership

Purell
SMARTLINK™

How It Works

The PURELL SMARTLINK™ secure software web portal allows users to customize alerts and alarms and includes data on dispenser usage, estimated refill replacement dates and alarm status and history.

Reduces Service Trips More Than

85%¹

Reduces Labor Time More Than

30%¹

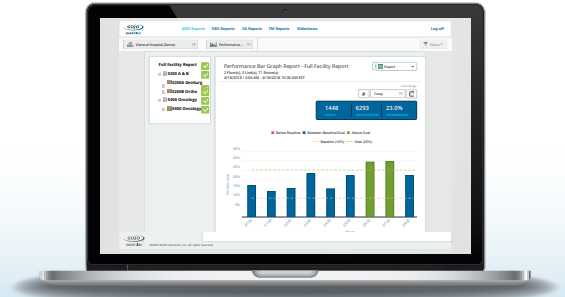

Reduces Refill Waste More Than

10%¹

PURELL SMARTLINK™ Service Alerts

Provide real-time monitoring of refill status, battery life and dispenser operation for proactive servicing and rapid response.

Service Alert Notifications

Key Benefits

Environmental Services/Maintenance Staff

receive predictive alerts and alarms that direct them to only those dispensers that need attention. This improves efficiency in maintaining dispensers so those resources can be focused on other service needs.

Medical Care Staff

will have access to fully functioning dispensers, assuring product is available for critical hand hygiene events that ultimately help reduce the spread of infections.
