## Skin Health and Hygiene Solutions from the inventors of PURELL® Hand Sanitizer

### **Saving lives and making life better through well-being solutions.**

It's the GOJO purpose, and it drives innovation in hand hygiene and skin care.

GOJO is the leading global producer and provider of skin health and hygiene solutions for away-from-home settings. Our portfolio includes handwashing, hand sanitizing, surface disinfectant, and skin moisturizing products under the GOJO® and PURELL® brand names.

# PURELL® MULTI-SURFACE DISINFECTANT – enjoy no-trade-off protection from germs.

## Fast and Effective

Effective enough to use in the most demanding environments but formulated for use on food-contact surfaces, PURELL Multi-Surface Disinfectant helps prevent the spread of germs on surfaces in a variety of places, on both hard and soft surfaces. This breakthrough formulation kills 36 germs in just 30 seconds, including norovirus, E.coli and cold & flu viruses, and has earned the EPA's Design for the Environment certification.

- Kills 36 germs in just 30 seconds

## No Harsh Fumes or Residue

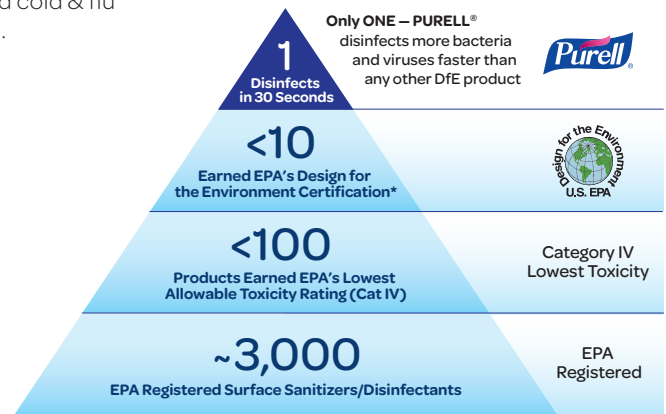

Our patented and powerful formulation is designed to accelerate the germ-killing power of alcohol, without the use of harsh chemicals.

- Formulated for food-contact surfaces – no rinse required
- No precautionary statements
- No handwashing, gloves, or safety glasses required
- Proven performance across most hard and soft surfaces

## EPA Design for the Environment (DfE) Certified

PURELL Multi-Surface Disinfectant delivers effective germ kill that upholds a responsible environmental profile.

- Features the EPA's lowest allowable toxicity rating
- Disinfects more bacteria and viruses faster than any other DfE product

\* as of July 2016

# Milliliter for milliliter, PURELL® Advanced Hand Sanitizers are more effective than higher alcohol formulations

U.S. Food and Drug Administration (FDA) Healthcare Personnel Hand Wash methodology: Hands are exposed to bacteria, then cleaned with 2 mL of hand sanitizer. This is repeated 10 times over several hours to duplicate real use in healthcare environments. After 10 cycles, the FDA requires a 3 Log Reduction in bacteria.

## WHAT IS LOG REDUCTION?

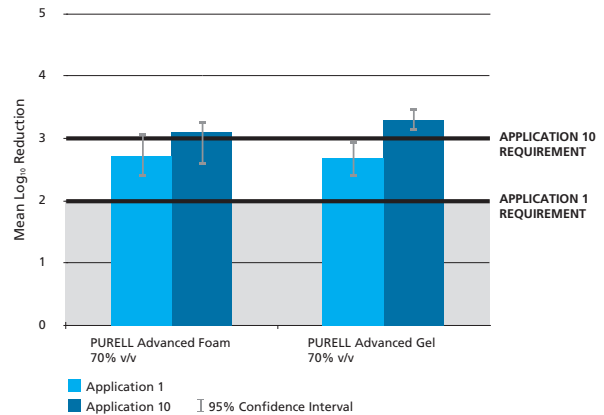

Log Reduction is the relative number of bacteria killed by sanitizing.

PURELL Advanced Hand Sanitizer Foam and Gel vs. Other Hand Sanitizers with Higher Volumes of Alcohol<sup>1</sup>  
HCPHW with 2.0 ml Application

### CONCLUSION:

Both PURELL Advanced Hand Sanitizer Gel and Foam formulations exceed U.S. Food and Drug Administration “Health Care Personnel Hand Wash” (HCPHW) requirements while outperforming other hand sanitizers – even those with a higher concentration of alcohol.

PURELL Advanced Instant Hand Sanitizer Gel and Foam Exceeds FDA Healthcare Personnel Hand Wash Requirements with Just 1.1 Milliliters of Product<sup>2</sup>  
HCPHW with 1.1 ml Application

### CONCLUSION:

With an application of just 1.1 ml of PURELL Advanced Hand Sanitizer, it exceeds FDA Healthcare Personnel Handwash requirements while maintaining skin health. When paired with GOJO® LTX™ and GOJO ADX™ dispensing systems, PURELL Advanced Hand Sanitizer provides healthcare workers with the FDA-required efficacy they need in just one pump.\*

\* Single pump claim applies only to ADX and LTX dispensers

# PURELL® Hand Sanitizer.

## The Most Effective. The Most Trusted. The Original.

PURELL hand sanitizers are trusted and used in hospitals, which means the same germ-fighting power doctors use to help prevent the spread of infection is available for everyone, in critical and everyday moments. From products that protect patients in hospitals to convenient, portable packaging and wipes, the same commitment to well-being goes into every PURELL product.

### PURELL SINGLES™ Packets

PURELL SINGLES Packets meet FDA efficacy requirements, in a convenient, discrete package.

- These single-use packs are great for on-the-go use and provide protection from germs in life's most important moments
- Take them in the car, in a pocket or purse – these single-use packets are incredibly versatile
- Kills 99.99% of most common germs that may make you sick

9620-2M

### PURELL® Hand Sanitizers

PURELL hand sanitizers are available in a wide variety of dispensing options, including:

- Wall-mount dispensers – Convenient, reliable dispensing for facilities that want to show their commitment to quality
- Tabletop bottles – Perfect for desks, reception areas, or breakrooms, bottles let you offer hand hygiene where it's needed most
- Wipes – These convenient wipes feature the same germ protection as our gel and foam formulations and are also available in stands, bottles, and flow packs.

## Classic Hand Hygiene Systems: Delivering Ongoing Support

As we continue to innovate to provide new formulations and dispensing systems, we acknowledge that there are formulations and systems in the market that still deserve to be serviced. These products still provide the effectiveness our customers deserve – which is why we have continued to produce and sell these solutions from the PURELL® and GOJO® brands.

# Two Leading Brands in Hand Hygiene and Skin Care

## Make your world more touchable with PURELL® Hand Sanitizer.

Wherever and whenever people interact, germs can quickly and easily spread. That's why at work, at school, and in professional settings, people trust PURELL Advanced Hand Sanitizer to kill germs and provide peace of mind.

## It's all about clean, healthy skin.

From the introduction of our first waterless hand cleaner more than 70 years ago to our newest foam cleansers, GOJO® products have consistently delivered high-quality solutions to help keep skin clean and healthy.

## Refillable Bulk Soap

A recent study shows 25% of refillable bulk soap dispensers contain unsafe levels of bacterial contamination.<sup>7</sup>

Sample of a bulk soap dispenser reservoir with significant soap contamination.

Refillable bulk systems are prone to environmental<sup>8</sup> and deliberate contamination. The problem can become so severe dispensers must be replaced. Permanent nozzles clog easily, and manual overfilling creates spill residue if not immediately cleaned.

### CONTAMINATION RISK

- One out of every 4 refillable bulk dispensers is contaminated with unsafe levels of bacteria, leaving hands with up to 25 times more germs after washing than before.<sup>9</sup>
- The U.S. Centers for Disease Control and Prevention (CDC), Health Canada and the World Health Organization (WHO) have all recognized the bacterial contamination risk of "topping up" refillable bulk soap dispensers and have issued guidelines against it.<sup>9,10,11</sup>
- Once dispensers are contaminated, even cleaning and soaking in bleach has been proven ineffective. Recontamination can occur within two weeks.<sup>12</sup> Contaminants can be present even when not obvious or visible.

## GOJO and PURELL® SANITARY SEALED™ Dispensing Systems

The safe and reliable dispensing choice.

SANITARY SEALED systems are always a better choice than refillable soap dispensers. These innovative sealed soap systems offer multiple advantages in terms of quality, reliability, ease of maintenance, and aesthetics.

### SANITARY SEALED Refills are *SAFE, SMART, and SIMPLE*

#### SAFE:

The soap or sanitizer inside is protected from contamination because it is factory-sealed. The soap is never exposed to the environment. Includes a fresh valve with each refill.

#### SMART:

The logical choice for helping prevent the spread of germs.

#### SIMPLE:

Virtually labor free: No-spill refills snap easily into a GOJO or PURELL dispenser in seconds.
